Bible Myths and Their Parallels in Other Religions (with numerous illustrations) Thomas William Doane

"He who knows only one religion knows none."—Prof. Max Muller.

"The same thing which is now called Christian Religion existed among the Ancients. They have begun to call Christian the true religion which existed before."—St. Augustine.

"Our love for what is old, our reverence for what our fathers used, makes us keep still in the church, and on the very altar cloths, symbols which would excite the smile of an Oriental, and lead him to wonder why we send missionaries to his land, while cherishing his faith in ours."—James Bonwick.

The subject of religion is one of the most explored areas in literature evoking emotional responses that touch all faiths. The Doane book is unparalleled in its presentation of the evolvement of myths and legends into the sacred texts used by numerous religions to establish their separate identities. One learns that no faith was derived from whole cloth but was woven, and therefore borrowed, from cultures that both preceded them and contemporaneously surrounded them. It provides a fascinating insight into the development of belief systems that have contributed to the development of mankind and its relationship with the spiritual. The massive array of footnotes move the text away from commentary and into the realm of a finely prepared scholarly thesis.
