Chapter 1 covers the history of pediatric chronic pain, the advancement pediatric pain as a clinical subspecialty, development of pediatric pain clinics, and characterization of the common pain syndromes. Chapters 2-4 cover, respectively, the research on early pain exposure and neuroplasticity, theories on the common adolescent pain syndromes, and the demographics of chronic pain in children. Chapters 5-16 discuss approaches to assessment and intervention for specific pediatric and adolescent pain syndromes. Chapters 17-23 address interventional techniques such as therapeutic blocks, neuroablation, implantable systems, physical therapy, complementary therapy, and pharmacology including opioid tolerance. The final chapter discusses the role of the nurse practitioner in pediatric chronic pain.
