Physics in Biology and Medicine, Fourth Edition (Complementary Science)

Paul Davidovits

Physics in Biology and Medicine, Fourth Edition (Complementary Science) Paul Davidovits

Physics in Biology and Medicine, Fourth Edition explores concepts in physics as they apply to living systems. The discussion is organized into 18 chapters encompassing thermodynamics, electricity, optics, sound, solid mechanics, fluid mechanics, and atomic and nuclear physics. Each chapter provides a brief review of the background physics before focusing on the applications of physics to biology and medicine. The book describes biological systems and presents calculations of the forces exerted by muscles, as well as the maximum impact that can be sustained by a body without injury, the height from which a person can jump, the effect of an animals size on the speed at which it can run, and the circulation of blood in the body. Using the theory of fluids, the role of diffusion in the functioning of cells and the effect of surface tension on the growth of plants in soil are also analyzed. Using the principles of electricity, the conduction of impulses along the nervous system is investigated. Each section contains problems that explore and expand some of the concepts, and some of the techniques of physics and engineering are applied to the study of living systems. Moreover, the use of lasers in medical diagnostics and the applications of nanotechnology in biology and medicine are considered.

This book will be a valuable resource for students and professors of physics, biology, and medicine, as well as for applied health workers.

- Provides practical techniques for applying knowledge of physics to the study of living systems
- Presents material in a straight forward manner requiring very little background in physics or biology
- Includes many figures, examples and illustrative problems and appendices which provide convenient access to the most important concepts of mechanics, electricity, and optics in the body

From reader reviews:

Shea Cross:

Spent a free the perfect time to be fun activity to complete! A lot of people spent their leisure time with their family, or their very own friends. Usually they performing activity like watching television, planning to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your personal free time/ holiday? Can be reading a book might be option to fill your free time/ holiday. The first thing that you ask may be what kinds of guide that you should read. If you want to try look for book, may be the guide untitled Physics in Biology and Medicine, Fourth Edition (Complementary Science) can be very good book to read. May be it might be best activity to you.

Stacey Williams:

Exactly why? Because this Physics in Biology and Medicine, Fourth Edition (Complementary Science) is an unordinary book that the inside of the guide waiting for you to snap this but latter it will zap you with the secret it inside. Reading this book next to it was fantastic author who else write the book in such wonderful way makes the content inside of easier to understand, entertaining method but still convey the meaning fully. So , it is good for you for not hesitating having this any longer or you going to regret it. This book will give you a lot of benefits than the other book get such as help improving your expertise and your critical thinking method. So , still want to hold off having that book? If I ended up you I will go to the reserve store hurriedly.

David McClure:

Within this era which is the greater person or who has ability in doing something more are more special than other. Do you want to become one among it? It is just simple method to have that. What you should do is just spending your time very little but quite enough to have a look at some books. On the list of books in the top list in your reading list is definitely Physics in Biology and Medicine, Fourth Edition (Complementary Science). This book which can be qualified as The Hungry Inclines can get you closer in becoming precious person. By looking up and review this e-book you can get many advantages.

Joseph Johnson:

Reading a e-book make you to get more knowledge from the jawhorse. You can take knowledge and information originating from a book. Book is created or printed or highlighted from each source this filled update of news. With this modern era like currently, many ways to get information are available for anyone. From media social including newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just trying to find the Physics in Biology and Medicine, Fourth Edition (Complementary Science) when you essential it?
