On the other hand, chronic anger, worry, and hostility increase the risk of developing heart disease, as people react to these feelings with raised blood pressure and stiffening of blood vessels. Positive Psychology, a Special Health Report from Harvard Medical School, is a guide to the concepts that can help you find well-being and happiness, based on the latest research. This report includes self-assessment tests and step-by-step advice and exercises to help you maximize the positive emotion in your life.
