Thomas Jefferson: Architect: The Interactive Portfolio Chuck Wills

Though Thomas Jefferson is thought of first and foremost as one of America's founding fathers, his contributions in the realm of architecture, design, and innovation were no less revolutionary. The third president created an American ideal in architecture that can be seen in numerous structures that define the landscape of his resident state of Virginia, and comprise what has come to be regarded as classic American colonial design.

Combining beautiful images, informative, accessible text, and removable memorabilia, this book celebrates the design of Jefferson's four most notable structures: the University of Virginia, his Monticello home, the Poplar Forest retreat, and the Virginia State Capitol.

Monticello is the only home in the United States designated as a World Heritage Site. This Charlottesville, Virginia residence is featured on the reverse side of the nickel, and brings more than 450,000 visitors to its halls each year. However, guests are only allowed viewing on the ground floor and in the cellar; *Thomas Jefferson: Architect* will be one of the few places to reveal the second and third floors.

Thomas Jefferson has never ceased to intrigue both the scholar and the casual history reader. New works about his life, his politics, and his writings continue to be published each year. As historical narratives dominate the nonfiction landscape, Jefferson remains a central figure in American history, and this unique volume adds a new facet to this fascinating man.
