The universe was born in a nuclear explosion. We live on a radioactive planet. Without radiation there would be not life. And yet radiation remains deeply misunderstood and often mistakenly feared. Now Dr. Robert Peter Gale—one of the world's leading experts on the subject—and Eric Lax set the record straight about subjects like uranium, plutonium, iodine-131, X-Rays, CT scans, and the radiation of food, while lucidly debunking myths about radioactivity. In this fascinating book, the authors explore the science, benefits, and risks of radiation exposure, drawing on the most up-to-date research and Gale's extensive experience treating victims of radiation accidents around the globe. Here is an illuminating and essential guide to our post-Chernobyl, post-Fukushima world.
