Teaching Decision Making To Adolescents Jonathan Baron, Rex V. Brown

This book describes a variety of programs -- firmly based in psychological theory and modern decision analysis -- that are suitable for teaching adolescents how to improve both their own decision making skills and their understanding of the decision making of others. Providing practical advice as well as theoretical analysis, this volume addresses general questions such as the nature and rationale of the enterprise, its implementation, and its evaluation. Relevant to several current adolescent problems including drug abuse, this is an excellent source, either as research, new curriculum, or enrichment of old curriculum.
